["BASIC INDEX "] BUY NIFTY 25400 CE @ 160 FOR THE TARGET 180-190-200 SL 130

Description NIFTY spot has given a **strong upside impulse** from ~25,300 and is holding above **25,380–25,400**, which is now **immediate support**. Price is consolidating near highs → **bullish continuation setup**. 25400 CE shows a **higher high–higher low structure** with healthy volumes after breakout. As long as **NIFTY sustains above 25,380**, upside momentum remains intact, on this behalf I rec to CE BUY
