Description NIFTY spot is **failing near 25,050–25,080 resistance** and showing rejection. Lower high structure + sideways consolidation after a bounce → **bearish continuation bias**. 25000 PE has **base support around 120–125** and is starting to curl up. Momentum likely if **NIFTY slips below 25,000** decisively, on this behalf I rec to PE BUY
